

City of Peterborough Media Release

For Immediate Release

May 14, 2018

Peterborough, ON --

City of Peterborough Online Competitive Bid Solicitation Opportunities Move to bids&tenders™

The City of Peterborough will officially join bids&tenders™, a digital procurement platform, beginning May 14, 2018.

Phase 1 of the project, will allow bidders to view, register and download bid opportunities online including Requests for Tenders, Quotes and Proposals. Phase 2 will include the ability for bidders to submit bids entirely online and will be introduced in the Fall of 2018.

bids&tenders is based on an unlimited-use model that cuts costs for suppliers and allows agencies, such as the City of Peterborough, to use all of the platform's features.

Suppliers must register and either:

- purchase an annual subscription fee,
- or pay-per-bid at a lower cost.

Once vendors subscribe, they have unlimited easy access to up-to-date information relevant to their bids including addenda, reminders, and more. Not only do they have access to all City of Peterborough bids, but every international bid opportunity on the platform as well.

Take a moment to register and see all the City of Peterborough's open bids on the bids&tenders platform by visiting <https://cityofpeterborough.bidsandtenders.ca>.

More information is available on the City of Peterborough website at www.peterborough.ca.
